

BurnFree fulfills the first aid needs of any burn emergency, from minor sunburns to life-threatening full-body burns. BurnFree Products offer immediate pain relief by cooling the burn wound.

BurnFree® Pain Relieving Gel

The BurnFree Pain Relieving Gel is a proprietary second generation burn care product. Developed without lidocaine, as in traditional older products. It eliminates the need to determine the severity of the burn before applying and avoids the potential for allergic reactions making it suitable for use on small children.

BurnFree Pain Relieving Gel is packaged in disposable 1/8 oz. (3.5 gr.) packages and in convenient squeeze bottles of 2 oz. (59 ml) and 4 oz. (118 ml). BurnFree is also the only international manufacturer offering a one-gram, single-use package and multiple-use spray bottles of 1.5 fl. oz. (45 ml) and 2.5 fl. oz. (75 ml) designed for first aid kits and in-home use. BurnFree 3.5 gr and 1 gr products are also available in dispenser packs.

BurnFree® Dressings

BurnFree Dressings have been designed to enable users to effectively and quickly respond to burn injuries. Utilizing a unique open-cell foam delivery system. BurnFree gel completely permeates the dressing. Unlike the older style polyester gauze products, this design brings more gel to the wound and allows for better heat absorption and cooling the burn site.

BurnFree Dressings are available in five traditional medical sizes:

- 2" x 2" (5 x 5 cm)
- 2" x 6" (5 x 15 cm)
- 4" x 4" (10 x 10 cm)
- 8" x 8" (20 x 20 cm)

This enable medical caregivers to quickly "size up" the burned areas and easily choose the appropriate dressing. All BurnFree Dressings are sterile to help reducing the risk of contamination and infection and prevent further damage to the wound site.

BurnFree® Blankets

BurnFree Blankets provide immediate physical, smoke and heat shielding protection from fire and meet or exceed requirements for a fire blanket when used for rescue and escape. BurnFree Blankets can also be used as a body wrap to extinguish the fire, cool and moister the burn, and soothe the pain while preventing further contamination of the burn site.

Available in three easily accessible sizes: 36" x 30" (91 x 60 cm), 6' x 5' (183 x 152 cm) and 8' x 5' (244 x 152 cm), the BurnFree Blankets are packed in soft-sided bags with carrying straps. This design facilitates a variety of ways to store the product before use, eliminating the need for cumbersome and expensive brackets and heavy carrying case. Blankets are also available in canister for special applications. The BurnFree 6' x 5' (183 x 152 cm) Blanket is the standard military issue in the U.S. and throughout the world (NSN#6510-01-242-2271).
